## **Profile:**

Experienced JavaScript Developer with 14 years of proven success in commercial front-end development. Adept at leveraging expert-level proficiency in front-end technologies to create engaging and dynamic user interfaces. Skilled in UI design, combining creativity with technical expertise to deliver visually appealing and functional solutions. Committed to driving innovation and achieving excellence in every project.

---

## **Employment History:**

### **Data Language - Front End Lead - 2018 September - Present**

Data Language is a knowledge graph and AI product company that delivers data platforms for global brands. I was working as a Front end Lead and UI Designer on various projects such as [Cochrane Covid 19](#), [Janes Intara Portal](#), Syngenta, [Resolute Square](#), Jamie Oliver, [Sideways](#) and some internal projects [Data Graphs](#), [Tagmatic](#), [Data Language company website](#) by doing UI/UX designs and user interface development using those technologies React, NextJS, Remix, Styled components. Created logos for various projects.

### **Identity - Javascript Developer - 2020 January - 2020 September**

Identity is a London based digital agency. I worked for them to develop RAF Presentation iPad application using React Native and RAF No Ordinary Job Game using Javascript.

### **M-IS - Senior Developer - 2016 March - 2018 September**

M-is provides integrated solutions for marketing, communications, experiential and digital marketing services. Developed and designed responsive web and mobile web projects by using React and NodeJS for McKinsey, Lyst, Philips, RAF.

### **Isobar - Lead Developer - 2013 - 2015 August**

Isobar is Dentsu's global creative digital agency. I worked in Istanbul, Turkey branch. Orchestrated responsive web applications and leap-motion projects for Adidas, Coca-Cola, Philips and Turkcell. Used technologies are BackboneJS and LeapMotionJS.

### **Webrazzi - Full Stack Developer and Designer - 2012 - 2013**

Webrazzi is a tech blog focused on startups, digital marketing similar to TechCrunch. I'm assigned of the process of designing and developing all Webrazzi internal projects.

## **Voden - Lead Developer - 2009 - 2012**

Voden is a digital creative agency in Istanbul, Turkey. Providing communication between designers and developers. Worked on various brands and bank websites such as Bridgestone, Coca-Cola, Kellog's, QNB Finansbank, Garanti BBVA, Hürriyet News, ING Bank, Turkish Airlines, TicketOnline, Turkcell.

---

### **Technical Skills:**

**Front-End Development:** Expertise in building dynamic and responsive user interfaces using React, Next.js, and Remix to deliver seamless user experiences.

Proficient in utilising CSS preprocessors such as Styled Components, Sass, and Less to craft visually appealing and efficient styles. Skilled in creating CSS animations, optimising performance, and ensuring accessibility standards.

Accomplished in developing mobile-friendly, mobile-first, and adaptive applications that provide consistent functionality and aesthetics across devices.

**Back-End Development:** Strong familiarity with Node.js for server-side scripting, enabling efficient and scalable web applications and experienced in GraphQL.

**Version Control:** Experienced in utilising Git version control systems to collaborate effectively with team members, manage codebase changes, and maintain project integrity.

**UI/UX:** Knowledgeable in creating user interface designs using tools like Sketch, Figma, and Photoshop, translating design concepts into functional and visually appealing user experiences.
